Seabasing JIC Approval Roadmap

- ✓ **8 July GO/FO Critical Comment Resolution Conference**
  - **20 Critical comments**
  - **201 Substantive comments**
  - **166 Administrative comments**
- ✓ **12 July FM FCB**
- ✓ **22 July JCB**
- ✓ **27 July OPSDEPS**
- ✓ **1 August JCS**

  Sept FAA

Tank Brief Summary

Seabasing Joint Integrating Concept was approved by all members of the JCS Tank.

- **Gen Myers**… I now understand Seabasing where I did not before.
- **Gen Cody**… Seabasing presents the need and justification for a Joint Heavy Lift aircraft.
- **Gen Moseley**… the Air Force approves of Seabasing as it brings to the forefront the Air Force capabilities of long range bombers, aerial refueling, and logistics lift.
- **ADM Mullen**… Seabasing is a potential avenue toward the joint development of the Army Afloat Strategic Flotilla and the MPF(F) as well as the Army Austere Access High Speed Sealift and the Navy's Rapid Strategic Lift Ship in a similar manner as we are proceeding with the JHSV.
- **Gen Nyland**… the Marine Corps has been developing this concept with the Navy for years and firmly stands behind it.
- **VADM Chanik**… Seabasing is an exciting concept and should be challenging for USTRANSCOM. The Capabilities Based Assessment report will be the first of many that should come before the JCS Tank, revealing the capability gaps that will support potential solution sets.

Seabasing JIC

- **JIC briefed to the JCB on 22 Jul 05**
- **Briefed to OpsDeps on 27 Jul 05**
- **Briefed to JCS Tank on 1 Aug 05**
- **JROCM currently in staffing – recommends the following:**
  - Continue Seabasing CBA effort until FAA/FNA complete
  - Produce a Joint Capability Document (JCD) and brief to JROC when complete
